

Red 'X' Lighting Board System

High tech system designed for ISU, impact protection and Traffic management vehicles offering advanced superior warning and information to oncoming traffic.

System is a combination of superior VMS 35k top board and a 610-arrow bottom board, both interlinked to a hand controller fitted in the cab.

VMS lighting arrow signboard has hydraulic raise/lower of top board. Fully synchronised top lighting arrow and bottom standard arrow. LED cab controls and malfunction and voltage indication. Automatic brightness control.

35k VMS board is equipped with red and amber LED's, which displays the arrow left and right along with red cross and the corresponding 2-fold flashing lights.

Blind system to display Convoy Vehicle No Overtaking.

Complying with Chapter 8 mobile lane closure standards.
